The most amazing thing I've ever seen is ...

The most amazing thing I've ever seen is computer because it is an interesting tool. First, it is full of fun, because I can play online games with all my friends. No matter how far we live, we can still play online games together at the same time. Computer brings us joy.

Second, I feel less bored when I play the computer as I can explore the outside world. The time seems going faster.

Third, I can use MSN to talk with my friends through the Internet. I can talk to the friends from all around the world. So computer is a good and useful thing. It's so amazing.
