

How do I equip myself for the HKDSE?

By Andy Yu (SS1E)

In our life, English is very important. The HKDSE is very difficult to me, so I need to equip myself for the HKDSE. I can learn English in the following ways:

First, I can watch English programmes when I am home, for example, the Pearl channel and the World channel. It can improve my listening skills.

Second, when I do reading, I can read English books. By reading English, I can learn a lot of new words. I can read newspapers as well. This can improve my reading skills.

Third, I can speak more English. I can communicate with my family members in English or I can talk with the foreigners. This can improve my speaking skills.

Fourth, I can listen to English songs or English music too when I am bored.

Fifth, I can go to tutorial classes. I can do more practice and make progress.

Finally, I can watch more English movies. By watching movies, I can listen to more English and understand more about the English culture.

I hope I can pass, get good results in the HKDSE and study at university.
